

NOTIFICATION

TO:

FROM: C.U. Recycling's Sorting Crew

SUBJECT: Contamination of Recyclables

DATE:

While collecting the recyclables from your building, a label with your name and/or address was discovered on non-recyclable paper (see attachment). This contaminated the recyclables in the collection containers.

Improper recycling causes unnecessary waste of labor and transportation and lowers the value of recyclables. The containers are for specific recyclable materials.

In the future, please try to put only the specific items requested into the containers. If you have any questions about contamination or proper recycling procedures, please call us at 492-8307. C.U. has one of the nation's leading campus recycling programs, but this has been made possible only by the cooperation of participants such as yourself. Thank you for your help.
